List of Add-on Programs/Certificate Programs

Academic Year: 2021-22

S.No	Name of the Program	Duration/Date	Number of Participants
1	A Two week certificate Program on "DEEP LEARNING TECHNIQUES"	04.04.2022 to 15.04.2022	103
2	A Two week certificate Program on "BLOCK CHAIN TECHNOLOGIES AND ITS APPLICATIONS"	13.12.2021 to 24.12.2021	57
3	A Two week certificate Program on "Advanced MATLAB Techniques "	11.04.2022 to 26.04.2022	62
4	A Two week certificate Program on "Smart Grid Technologies"	01.11.2021 to 13.11.2021	50
5	A Two week certificate Program on "GENERATIVE DESIGN FOR ADDITIVE MANUFACTURING "	21.02.2022 to 04.03.2022	88
6	A Two week certificate Program on "INDUSTRY4.0 "	13.09.2021 to 24.09.2021	88
7	A Two week certificate Program on "Design of CMOS Technology using VHDL "	21.03.2022 to 01.04.2022	43
8	A Two week certificate Program on "Implementation of DSP Algorithms on Digital platforms"	18.10.2021 to 29.10.2021	43
9	A Two week certificate Program on "FIELD COMPACTION FOR SOIL AND ROAD WORKS"	04.04.2022 to 16.04.2022	87
10	A Two week certificate Program on "DESIGN AND DRAWING OF COMPOSITE BRIDGES "	08.11.2021 to 20.11.2021	34
11	A Two week certificate Program on "Employee Training and Development "	13.09.2021 to 24.09.2021	114

A Two week Certificate Program on DEEP LEARNING TECHNIQUES

04.04.2022 to 15.04.2022

Program Schedule

Academic Year:2021-22

Date:25-03-2022

S.No	Date	Topics to be Covered	Name of The Resource Person
1	04-04-2022	Fundamentals of Deep Learning:Artificial Intelligence, History of Machine learning: Probabilistic Modeling, Early Neural Networks	Dr. B.Srinivas M.Tech.,Ph.D
2	05-04-2022	Kernel Methods, Decision Trees, Random forests and Gradient Boosting Machines,	Dr. B.Srinivas M.Tech.,Ph.D
3	06-04-2022	Fundamentals of Machine Learning:Four Branches of Machine Learning, Evaluating Machine learning Models, Overfitting and Underfitting.	Dr. K.Chinna Rao M.Tech.,Ph.D
4	07-04-2022	Introducing Deep Learning:Biological and Machine Vision, Human and Machine Language	Dr. K.Chinna Rao M.Tech.,Ph.D
5	08-04-2022	Artificial Neural Networks, Introduction to Keras: Keras, TensorFlow, Theano and CNTK	Dr. B.Srinivas M.Tech.,Ph.D
6	11-04-2022	Setting up Deep Learning Workstation, Classifying Movie Reviews: Binary Classification, Classifying newswires: Multiclass Classification	Dr. B.Srinivas M.Tech.,Ph.D
7	12-04-2022	Convolutional Neural Networks:Neural Network and Representation Learning, Convolutional Layers, Multichannel Convolution Operation	Dr. K.Chinna Rao M.Tech.,Ph.D
8	13-04-2022	Recurrent Neural Networks:Introduction to RNN, RNN Code, PyTorch Tensors: Deep Learning with PyTorch, CNN in PyTorch	Dr. K.Chinna Rao M.Tech.,Ph.D
9	14-04-2022	Interactive Applications of Deep Learning:Machine Vision, Natural Language processing, Generative Adversarial Networks, Deep Reinforcement Learning	Dr. B.Srinivas M.Tech.,Ph.D
10	15-04-2022	Deep Learning Research:Autoencoders, Deep Generative Models: Boltzmann Machines Restricted Boltzmann Machines, Deep Belief Networks	Dr. B.Srinivas M.Tech.,Ph.D

ABOUT THE PROGRAM

This Program explores the intersection of artificial intelligence and machine learning. Participants will delve into the latest advancements in AI technologies, examining their potential to revolutionize data driven insights and decision-making process. Through a combination of theoretical discussions, practical demonstrations, and hands-on exercises, attendees will gain a comprehensive understanding of how AI technology.

Objective :

Deep learning is the subset of machine learning methods based on neural networks with representation learning. The adjective "deep" refers to the use of multiple layers in the network. Methods used can be supervised, semi-supervised or unsupervised.

Outcome:

Deep-learning architectures such as deep neural networks, deep belief networks, recurrent neural networks, convolution neural networks and transformers have been applied to fields including computer vision, speech recognition, natural language processing, machine translation, bioinformatics, drug design, medical image analysis, climate science, material inspection and board game programs, where they have produced results comparable to and in some cases surpassing human expert performance.

The Department of Computer Science and Engineering organized a Two Week certificate program on "Machine Learning with Python" for II Year B.Tech CSE and AIML Students. **Deep learning** is the subset of machine learning methods based on neural networks with representation learning. The adjective "deep" refers to the use of multiple layers in the network. Methods used can be supervised, semi-supervised or unsupervised. Deep-learning architectures such as deep neural networks, deep belief networks, recurrent neural networks, convolution neural networks and transformers have been applied to fields including computer vision, speech recognition, natural language processing, machine translation, bioinformatics, drug design, medical image analysis, climate science, material inspection and board game programs, where they have produced results comparable to and in some cases surpassing human expert performance. Early forms of neural networks were inspired by information processing and distributed communication nodes in biological systems, in particular the human brain. However, current neural networks do not intend to model the brain function of organisms, and are generally seen as low quality models for that purpose. Totally 103 students participated in this training program and after the completion of the program the students able to understand the following objectives and learning outcomes.

Course Objectives: The student will be able to

- Learn deep learning methods for working with sequential data,
- Learn deep recurrent and memory networks,
- Learn deep Turing machines,
- Apply such deep learning mechanisms to various learning problems.
- Know the open issues in deep learning, and have a grasp of the current research directions.

Course Outcomes (COs): At the end of the course, student will be able to

- Demonstrate the fundamental concepts learning techniques of Artificial Intelligence, Machine Learning and Deep Learning.
- Discuss the Neural Network training, various random models.
- Explain the Techniques of Keras, TensorFlow, Theano and CNTK
- Classify the Concepts of CNN and RNN
- Implement Interactive Applications of Deep Learning.

SRI VENKATESWARA COLLEGE OF ENGINEERING & TECHNOLOGY

Accredited by NAAC with 'A' Grade

(Approved by AICTE, New Delhi; Affiliated to JNTUK, Kakinada; G.O.Ms.No. 101, Dt. 09-07-08)

NH-5, ETCHERLA-532410, SRIKAKULAM (Dist.), ANDHRA PRADESH

A Two week Certificate Program on BLOCK CHAIN TECHNOLOGIES AND ITS APPLICATIONS

13.12.2021 to 24.12.2021

Program Schedule

Academic Year:2021-22

Date: 03-12-2021

S.No	Date	Topics to be Covered	Name of The Resource Person
1	13-12-2021	Introduction, basic ideas behind block chain, how it is changing the landscape of digitalization	Dr. B.Santhosh Kumar M.Tech.,Ph.D
2	14-12-2021	Introduction to cryptographic concepts required, Block chain or distributed trust, Currency, Cryptocurrency.	Dr. B.Santhosh Kumar M.Tech.,Ph.D
3	15-12-2021	Hashing, public key cryptosystems, private vs public block chain and use cases, Hash Puzzles, Extensibility of Block chain concepts	Dr. K.Chinna Rao M.Tech.,Ph.D
4	16-12-2021	Digital Identity verification, Block chain Neutrality, Digital art, Block chain Environment	Dr. K.Chinna Rao M.Tech.,Ph.D
5	17-12-2021	Introduction to Bitcoin:Bitcoin Block chain and scripts, Use cases of BitcoinBlockchain scripting language in micropayment.	Dr. B.Santhosh Kumar M.Tech.,Ph.D
6	20-12-2021	Block chain Science: Grid coin, Folding coin, Block chain Genomics, Bit coin MOOCs.	Dr. B.Santhosh Kumar M.Tech.,Ph.D
7	21-12-2021	Ethereum continued, IOTA, The real need for mining, consensus, Byzantine Generals Problem, and Consensus as a distributed coordination problem.	Dr. K.Chinna Rao M.Tech.,Ph.D
8	22-12-2021	Introduction to Hyper ledger, Currency, Token, Campus coin, Coin drop as a strategy for Public adoption, Currency Multiplicity, Demurrage currency.	Dr. K.Chinna Rao M.Tech.,Ph.D
9	23-12-2021	Technical challenges, Business model challenges, Scandals and Public perception, Government Regulations	Dr. B.Santhosh Kumar M.Tech.,Ph.D
10	24-12-2021	Uses of Block chain in E-Governance, Land Registration, Medical Information Systems	Dr. B.Santhosh Kumar M.Tech.,Ph.D

ABOUT THE PROGRAM

This Program explores the intersection of artificial intelligence and machine learning. Participants will delve into the latest advancements in AI technologies, examining their potential to revolutionize data driven insights and decision-making process. Through a combination of theoretical discussions, practical demonstrations, and hands-on exercises, attendees will gain a comprehensive understanding of how AI technology.

Objective :

A Block Chain Technologies is a distributed ledger with growing lists of records (blocks) that are securely linked together via cryptographic hashes. Each block contains a cryptographic hash of the previous block, a timestamp, and transaction data (generally represented as a Merkle tree, where data nodes are represented by leaves).

Outcome:

Block chain transactions are irreversible in that, once they are recorded; the data in any given block cannot be altered retroactively without altering all subsequent blocks. Blockchains are typically managed by a peer-to-peer (P2P) computer network for use as a public distributed ledger, where nodes collectively adhere to a consensus algorithm protocol to add and validate new transaction blocks.

ABOUT SVCET:

Established in the year 2008 by Vikas Educational Society- the corporate social responsibility arm of SVCET Group and affiliated to JNTUK, Kakinada. SVCET offers high quality technical education for aspiring Engineers. College is located in Etcherla, Srikakulam district of Andhra Pradesh. SVCET provides its learning community state-of-the-art facilities, infrastructure, and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of reinforcing its emphasis on a well-rounded education that makes SVCET a one of the preferred institutes among engineering colleges in India.

ABOUT THE CSE DEPARTMENT:

The Department of Computer Science and Engineering was established in 2008. The department offers four-year B.Tech Programs in CSE, CSE-CSM and two-year M.Tech programs. It has a rich tradition and well-qualified faculty, along with widely recognized laboratories. The department aims to provide a strong foundation in Computer Science and Engineering fundamentals, emphasizing mathematical and scientific principles. Additionally, the course focuses on developing skills in the application of design processes for innovative engineering solutions. The annual intake of students in CSE, CSE-CSM is 150.

DEPARTMENT VISION:

Emerge as a center of Pre-eminence in Computer Science and Engineering Education, Research and Services.

DEPARTMENT MISSION:

- To produce graduates with scientific and technical knowledge and excellent Computer Science and Engineering skills for professional practice, employment, advanced study and research.
- To introduce professional and ethical values related to industry, society and environment.
- To interact with industries, to meet their requirements through employable graduates

The Department of Computer Science and Engineering organized a Two Week certificate program on “BLOCK CHAIN TECHNOLOGIES AND ITS APPLICATIONS” for IV, IIIB.Tech and M.Tech(CSE) Students. A Block Chain Technologies is a distributed ledger with growing lists of records (blocks) that are securely linked together via cryptographic hashes. Each block contains a cryptographic hash of the previous block, a timestamp, and transaction data (generally represented as a Merkle tree, where data nodes are represented by leaves). Since each block contains information about the previous block, they effectively form a chain (compare linked list data structure), with each additional block linking to the ones before it. Consequently, blockchain transactions are irreversible in that, once they are recorded; the data in any given block cannot be altered retroactively without altering all subsequent blocks. Blockchains are typically managed by a peer-to-peer (P2P) computer network for use as a public distributed ledger, where nodes collectively adhere to a consensus algorithm protocol to add and validate new transaction blocks. Although blockchain records are not unalterable, since blockchain forks are possible, blockchains may be considered secure by design and exemplify a distributed computing system with high Byzantine fault tolerance. Totally 57 students participated in this training program and after the completion of the program the students able to understand the following objectives and learning outcomes.

Course Objectives: The student will be able to

- To understand block chain technology and Cryptocurrency works
- Blockchain eliminates the need for a central authority or intermediary to verify and authorize transactions
- Each transaction or data entry is securely recorded in a block, and each block is cryptographically linked to the previous one, forming an immutable chain.
- Transactions on the block chain are visible to all participants in the network.
- In block chain, trust is established through cryptographic algorithms and consensus mechanisms, eliminating the need for blind trust in a single entity.
- Block chain technology is to revolutionize the way data and transactions are managed, providing a more secure, transparent, and efficient alternative to traditional centralized systems

Course Outcomes (COs): At the end of the course, student will be able to

- Demonstrate the block chain basics, Crypto currency
- To compare and contrast the use of different private vs. public block chain and use cases
- Design an innovative Bit coin Block chain and scripts, Block chain Science on varies coins
- Classify Permission Block chain and use cases – Hyper ledger, Corda
- Make Use of Block-chain in E-Governance, Land Registration, Medical Information Systems and others

ABOUT THE PROGRAM

Python Fundamentals" is typically designed to introduce newcomers to the basics of Python programming. Such workshops often aim to provide a comprehensive overview of Python's core concepts, focusing on practical applications and hands-on experience.

Objective :

To Provide participants with a comprehensive understanding of the Python programming language, including its syntax, features, and applications. To Cover fundamental programming concepts such as variables, data types, operators, control flow structures, functions, and basic I/O operations in Python.

To each participants the principles of OOP in Python, including classes, objects, inheritance, encapsulation, and polymorphism.

Expected Outcome:

Ability to design and implement complex applications using Python Understanding of object-oriented programming (OOP) principles and the ability to create classes and objects. Proficiency in using inheritance, encapsulation, and polymorphism in Python classes. Familiarity with advanced topics such as decorators, generators, and context managers.

ETCHERLA, Srikakulam-532410 (A.P)**

ABOUT SVCET:

Established in the year 2008 by Vikas Educational Society-the corporate social responsibility arm of SVCET Group and affiliated to JNTUGV, Vizianagaram. SVCET offers high quality technical education for aspiring Engineers. College is located in Etcherla, Srikakulam district of Andhra Pradesh. SVCET provides its learning community state-of-the-art facilities, infrastructure, and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of reinforcing its emphasis on a well-rounded education that makes SVCET a one of the preferred institutes among engineering colleges in India.

ABOUT THE DEPARTMENT

Electrical and Electronics Engineering is a profession that uses science, technology and problem solving skills to design construct and maintain products. It is a challenging but exciting and rewarding area to study. The department of EEE was established in 2008 with aim of importing high quality technical education in the area of Electrical and Electronics Engineering with an intake of 60 and is affiliated to Jawaharlal Nehru Technological University, Kakinada approved by AICTE.

DEPARTMENT VISION

To be a globally recognized center of excellence in Electrical and Electronic Engineering, pioneering innovations that shape the future of technology and society

DEPARTMENT MISSION

Our mission is to provide transformative education, conduct cutting-edge research, and foster innovation in Electrical and Electronic Engineering to address global challenges and improve quality of life.

Number of Students attended : 62

Venue: Class Room-CP lab.

Sri Venkateswara College of Engineering and Technology, Organized a Certificate Program on **A two week Deep Dive Workshop on "Advanced MATLAB Techniques"** For the final year B.Tech Students By the Resource Persons **Mr. Dr. D.Vijay Kumar & Mr.A.Apparao** has highlighted following points.

Course Objectives:

- To Perform numerical computations and analyses for mathematical and scientific problems.
- To Solve equations, integrate functions, and optimize solutions.
- To Create simulations and models for engineering, physics, and other scientific applications using the Simulink environment.
- To Design, analyze, and simulate control systems for applications in engineering and automation.

Learning Outcomes:

- Ability to solve complex mathematical problems and perform numerical analyses using MATLAB's computational capabilities
- Proficiency in processing, analyzing, and visualizing data, aiding in data-driven decision-making.
- Acquiring programming skills with a focus on MATLAB syntax, structure, and best practices.
- Proficiency in using MATLAB and Simulink for simulating and modeling dynamic systems, enabling the understanding of system behavior.
- Understanding and designing control systems for engineering applications.

Ability to use MATLAB for educational purposes, including teaching and learning in academic settings.

ABOUT THE PROGRAM

A two-week workshop on "Smart Grid Technologies" typically aims to provide participants with an in-depth understanding of the advanced technologies and innovations driving modern power grid systems. Here's a comprehensive overview of what such a workshop might entail

Objective :

The objective of a two-week workshop on "Smart Grid Technologies" can be multi-faceted, aiming to provide participants with a comprehensive understanding of smart grid concepts, technologies, and their applications. Here are some potential objectives for such a workshop

Expected Outcome:

The outcome of a two-week workshop on "Smart Grid Technologies" can be evaluated from several perspectives including knowledge acquisition, skill development, networking opportunities, and practical implementation. Here are the potential outcomes in detail Comprehensive knowledge of smart grid concepts, components, and technologies. Awareness of current trends, innovations, and future directions in smart grid technology.

PROGRAM REPORT

Name of the Event:

A Two week workshop on "Smart Grid Technologies"

Date: 01.11.2021 to 13.11.2021

Resource Person: 1. Dr.D.Bala Murali
Associate Professor
EEE Dept,AITAM
Email: balu_p4@yahoo.com
Phone number : 9441259878

2. Mr.V.Vykunta Rao
Assistant Professor
Department Of EEE,SVCET
Mobile number: 8499935804
Email: vykunt555@gmail.com

Name of co-ordinator:

Mr.K.Seetharamayya
Assistant Professor
Department Of EEE,SVCET
Mobile number: 9515468085
Email: seetharamayyakonni@gmail.com

Number of Students attended : 50

Venue: Class Room- PS&S lab.

. Sri Venkateswara College of Engineering and Technology, Organized a Certificate Program on **A Two week workshop on "Smart Grid Technologies"**. For the final year B.Tech Students By the Resource Persons **Dr.D.Bala Murali & Mr.V.Vykunta Rao** has highlighted following points

Objectives:

- Gain a comprehensive understanding of what smart grids are, their components, and how they function compared to traditional power grids.
- Learn about the potential benefits of smart grids, such as improved reliability, efficiency, and integration of renewable energy, as well as the challenges associated with their deployment and operation.
- Familiarize yourself with the various technologies involved in smart grids, including advanced metering infrastructure (AMI), sensors, communication networks, and control systems.

- Understand the strategies and approaches used to modernize existing power grids to accommodate the transition to smart grid technology, including infrastructure upgrades and policy frameworks.
- Gain awareness of the regulatory and policy frameworks governing smart grid deployment, including standards compliance, data privacy regulations, and government initiatives supporting grid modernization.

Learning Outcomes:

- Understanding of Smart Grid Fundamentals
- Knowledge of Key Technologies and Components
- Awareness of Benefits and Challenges
- Insight into Grid Modernization Strategies
- Understanding of Grid Operations and Control
- Ability to Evaluate Case Studies and Best Practices
- Effective Communication of Smart Grid Concepts

This course was very useful to the students and their feedback is positive. The management and Dr.S.C.V.Ramana Murthy ,Principal of SVCET thanked the resource Person and participants for making the program successful.

A Two Week Add-On Program on "Generative Design for Additive Manufacturing"

21-02-2022 to 04-03-2022

Program Schedule

Academic Year:2021-22

S.No	Date	Topics to be Covered	Name of The Resource Person
1	21-02-2022	Introduction to Generative Design for Additive Manufacturing	Mr.L.Mohana Rao Asst.Professor, Mechanical Dept, SVCET, Etcherla
2	22-02-2022	Describe shape optimization to generative design, Fusion 360 interface	Mr.L.Mohana Rao Asst.Professor, Mechanical Dept, SVCET, Etcherla
3	23-02-2022	Basics of sketching	Mr.L.Mohana Rao Asst.Professor, Mechanical Dept, SVCET, Etcherla
4	24-02-2022	Generative design workspace, study settings, material selection	Mr.L.Mohana Rao Asst.Professor, Mechanical Dept, SVCET, Etcherla
5	25-02-2022	creating 3D design	Mr.L.Mohana Rao Asst.Professor, Mechanical Dept, SVCET, Etcherla
6	28-02-2022	Viewing and editing designs	Mr.S.Lakshmana Raju Asst.Professor,Department of ME Sri Sivani College of Engineering, Chilakapalem
7	01-03-2022	Exporting mesh design, Practice exercises	Mr.S.Lakshmana Raju Asst.Professor,Department of ME Sri Sivani College of Engineering, Chilakapalem
8	02-03-2022	Post processing additive manufacturing creating box primitive	Mr.S.Lakshmana Raju Asst.Professor,Department of ME Sri Sivani College of Engineering, Chilakapalem
9	03-03-2022	Creasing & uncreasing edges, freeze & unfreeze	Mr.S.Lakshmana Raju Asst.Professor,Department of ME Sri Sivani College of Engineering, Chilakapalem
10	04-03-2022	Practice exercises	Mr.S.Lakshmana Raju Asst.Professor,Department of ME Sri Sivani College of Engineering, Chilakapalem

ABOUT THE PROGRAM

A two week certificate program on “**Generative Design for Additive Manufacturing**” typically aims to provide participants with a comprehensive Define generative objectives, obstacle regions, preserve regions, setting up load, selecting manufacturing method, previewer Solve generative study, view and edit generative outcome live, export mesh design.

Objective

Describe shape optimization to generative design, Fusion 360 interface, and basics of sketching.

Illustrate Generative design workspace, study settings, material selection.

Selecting outcomes, creating 3D design, viewing and editing designs.

Describe post processing additive manufacturing – creating box primitive, using edit form, creasing & uncreasing edges, freeze & unfreeze

Expected Outcome

Upon completion of this course the student will be able to:

Understand shape optimization to generative design, Fusion 360 interface, and basics of sketching

Define generative objectives, obstacle regions, preserve regions, setting up load, selecting manufacturing method, previewer Solve generative study, view and edit generative outcome live, export mesh design.

ABOUT SVCET:

Established in the year 2008 by Vikas Educational Society-the corporate social responsibility arm of SVCET Group and affiliated to JNTUK, Kakinada. SVCET offers high quality technical education for aspiring Engineers. College is located in Etcherla, Srikakulam district of Andhra Pradesh. SVCET provides its learning community state-of-the-art facilities, infrastructure, and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of reinforcing its emphasis on a well-rounded education that makes SVCET a one of the preferred institutes among engineering colleges in India.

ABOUT THE DEPARTMENT:

Mechanical Engineering is a field that utilizes science, technology, and problem-solving skills to design, construct, and maintain products. It is a challenging yet fascinating and fulfilling area of study. Founded in 2008, the Department of Mechanical Engineering aims to deliver high-quality technical education in Mechanical Engineering with an initial intake of 120 students. Affiliated with Jawaharlal Nehru Technological University, Kakinada and approved by AICTE, the department offers various courses that students from other departments can choose as electives. The curriculum is designed to elevate the college to the standards of advanced institutions. The department is dedicated to enhancing Industry-Institute Interaction in academics and research, as well as developing infrastructure to meet industry requirements.

DEPARTMENT VISION:

Emerge as a Center of pre-eminence in
Mechanical
Engineering Education, Research and Services

DEPARTMENT MISSION:

To produce graduates with scientific and technical knowledge and excellent mechanical engineering skills for professional practice, employment, advanced study and research.
To introduce professional and ethical values related to industry, society and environment.
To interact with industries, to meet their requirements through employable graduates.

PROGRAM REPORT

Name of the Program : A Two Week Add-on Program on “**Generative Design for Additive Manufacturing**”

Program Duration : 21-02-2022 to 04-03-2022

Resource Person Details : 1. Mr. L. Mohan Rao
Asst. Professor, Mechanical Dept,
Sri Venkateswara College Of Engineering & Technology, Etcherla
E_MAIL: mohanraolavinipilli@gmail.com
Contact No: 9848388725

2. Mr. S. Lakshmana Raju
Asst. Professor, Department of ME
Sri Sivani College of Engineering, Chilakapalem
Contact No: 8555997038

Program Coordinator : Mr. G. Hareesh
Asst. Professor, Mechanical Department,
Sri Venkateswara College of Engineering and Technology,
Contact Number: 8464962205
E_MAIL: harihappy123@gmail.com

Number of Students attended : 88

Program Venue : SEMINAR HALL, Block-A

Resource Person Picture:

Program Objectives:

- Describe shape optimization to generative design, Fusion 360 interface, and basics of sketching.
- Illustrate Generative design workspace, study settings, material selection.
- Selecting outcomes, creating 3D design, viewing and editing designs, exporting mesh design,
Practice exercises
- Describe post processing additive manufacturing – creating box primitive, using edit form, creasing
& uncreasing edges, freeze & unfreeze

Learning Outcomes:

Upon completion of this course the student will be able to:

- Understand shape optimization to generative design, Fusion 360 interface, and basics of sketching
- Define generative objectives, obstacle regions, preserve regions, setting up load, selecting manufacturing method, previewer
- Solve generative study, view and edit generative outcome live, export mesh design.
- Post process the mesh design for additive manufacturing.

This certificate course was very useful to students and their feedback is positive. The Management and Principal of Sri Venkateswara College of Engineering and Technology, thanked the resource person and participants for making the programme Successful.

CIRCULAR

It is hereby informed to all the IV,III B.Tech MECH and M.Tech(MECH) students, that the Department of Mechanical Engineering is conducting **A Two week certificate Program on "INDUSTRY4.O"** from 13.09.2021 To 24.09.2021. The students shall register their name with coordinator on or before 10.09.2021.

VENUE: Seminar Hall Block – A, SVCET.

A Two week certificate Program on

“ INDUSTRY 4.0 ”

13/09/2021 to 24/09/2021

Program Schedule

Academic Year:2021-22

S.No	Date	Topics to be Covered	Name of The Resource Person
1	13/09/2021	Introduction to Industry 4.0	Mr.K.PREMA KUMAR, Associate Professor, Sri Sivani College of Engineering , Chilakapalem
2	14/09/2021	Automation and Robotics	Mr.K.PREMA KUMAR, Associate Professor, Sri Sivani College of Engineering , Chilakapalem
3	15/09/2021	Internet of Things (IOT)	Mr.K.PREMA KUMAR, Associate Professor, Sri Sivani College of Engineering , Chilakapalem
4	16/09/2021	IOT in supply Chain resilience	Mr.K.PREMA KUMAR, Associate Professor, Sri Sivani College of Engineering , Chilakapalem
5	17/09/2021	Smart Factories and Digital Twins	Mr.K.PREMA KUMAR, Associate Professor, Sri Sivani College of Engineering , Chilakapalem
6	20/09/2021	Data Analytics and AI	Dr. B.HARISANKHAR RAO Assoc.Professor, Mechanical Dept Sri Venkateswara College of Engineering & Technology,Etcherla
7	21/09/2021	Artificial Intelligence Applications	Dr. B.HARISANKHAR RAO Assoc.Professor, Mechanical Dept Sri Venkateswara College of Engineering & Technology,Etcherla
8	22/09/2021	Building Resilient Supply Chains	Dr. B.HARISANKHAR RAO Assoc.Professor, Mechanical Dept Sri Venkateswara College of Engineering & Technology,Etcherla
9	23/09/2021	Post-Pandemic Supply Chain Management	Dr. B.HARISANKHAR RAO Assoc.Professor, Mechanical Dept Sri Venkateswara College of Engineering & Technology,Etcherla
10	24/09/2021	Post-Pandemic Case Studies	Dr. B.HARISANKHAR RAO Assoc.Professor, Mechanical Dept Sri Venkateswara College of Engineering & Technology,Etcherla

ABOUT THE PROGRAM

A two week certificate program on "INDUSTRY4.0" typically aims to provide participants with a comprehensive understanding On Grasp Industry 4.O Fundamentals. Explore Automation and IOT Technologies. Analyze Data-Driven Decision-Making. Familiar with Electric vehicle energy management strategies.

Objective :

- To introduce students to the concepts and technologies associated with the fourth industrial revolution.
- To prepare students for the changing landscape of industry by equipping them with knowledge and skills related to automation, Internet of Things, and data-driven decision-making.
- Analyze successful case studies and best practices in the context of Industry 4.O adoption

Expected Outcome:

Upon completion of this course the student will be able to:

- Grasp Industry 4.O Fundamentals.
- Explore Automation and IOT Technologies.
- Analyze Data-Driven Decision-Making.
- Familiar with Electric vehicle energy management strategies.
- Learn from real-world examples of companies embracing Industry 4.0 technologies.

ABOUT SVCET:

Established in the year 2008 by Vikas Educational Society-the corporate social responsibility arm of SVCET Group and affiliated to JNTUK, Kakinada. SVCET offers high quality technical education for aspiring Engineers. College is located in Etcherla, Srikakulam district of Andhra Pradesh. SVCET provides its learning community state-of-the-art facilities, infrastructure, and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of reinforcing its emphasis on a well-rounded education that makes SVCET a one of the preferred institutes among engineering colleges in India.

ABOUT THE DEPARTMENT:

Mechanical Engineering is a field that utilizes science, technology, and problem-solving skills to design, construct, and maintain products. It is a challenging yet fascinating and fulfilling area of study. Founded in 2008, the Department of Mechanical Engineering aims to deliver high-quality technical education in Mechanical Engineering with an initial intake of 120 students. Affiliated with Jawaharlal Nehru Technological University, Kakinada and approved by AICTE, the department offers various courses that students from other departments can choose as electives. The curriculum is designed to elevate the college to the standards of advanced institutions. The department is dedicated to enhancing Industry-Institute Interaction in academics and research, as well as developing infrastructure to meet industry requirements.

DEPARTMENT VISION:

Emerge as a Center of pre-eminence in Mechanical Engineering Education, Research and Services

DEPARTMENT MISSION:

- To produce graduates with scientific and technical knowledge and excellent mechanical engineering skills for professional practice, employment, advanced study and research.
- To introduce professional and ethical values related to industry, society and environment.
- To interact with industries, to meet their requirements through employable graduates.

PROGRAM REPORT

NAME OF THE PROGRAM : A Two week certificate Program on " **INDUSTRY4.0** "

DATE : 13.09.2021 To 24.09.2021

RESOURCE PERSONS : 1. Mr. K.PREMA KUMAR
Associate Professor, Dept.ME.
Sri Sivani College Of Engineering ,Chilakapalem.
Contact No:-9849475315
E_MAIL:-prema.tlc@gmail.com

2. Mr. P. SIVARAM
Asst. Professor, Department of ME
Sri Venkateswara College of Engineering and Technology, Etcherla.
Contact No: 9493761887
E_Mail:sivaram.potnuru@gmail.com

THE COORDINATOR : Mr.G.Hareesh
Asst. Professor, Mechanical Department,
Sri Venkateswara College of Engineering and Technology,
Contact Number: 8464962205
E_MAIL:-harihappy123@gmail.com

NUMBER OF THE STUDENTS ATTENDED : 88

VENUE : BLOCK – C : SEMINAR HALL & COMPUTER LAB - 3.

Resource Person Picture :

Program Objectives:

- To introduce students to the concepts and technologies associated with the fourth industrial revolution.
- To prepare students for the changing landscape of industry by equipping them with knowledge and skills related to automation, Internet of Things, and data-driven decision-making.
- Analyze successful case studies and best practices in the context of Industry 4.0 adoption.

SRI VENKATESWARA COLLEGE OF ENGINEERING & TECHNOLOGY

ISO 9001:2015 Certified

(Approved by AICTE, New Delhi, Affiliated to JNTUK, Kakinada)

Office : +91 7901467802, email: principal_svcet@yahoo.com, website: www.svcet.info

Learning Outcomes:

Upon completion of this course the student will be able to:

- Grasp Industry 4.0 Fundamentals.
- Explore Automation and IOT Technologies.
- Analyze Data-Driven Decision-Making.
- Familiar with Electric vehicle energy management strategies.
- Learn from real-world examples of companies embracing Industry 4.0 technologies.

This certificate course was very useful to students and their feedback is positive. The Management and Principal of Sri Venkateswara College of Engineering and Technology thanked the resource persons and participants for making the programme Successful.

ABOUT THE PROGRAM

Aimed at equipping participants with the skills and knowledge necessary to design, simulate, and verify CMOS circuits using VHDL (VHSIC Hardware Description Language). This program is essential for professionals and students involved in the design and development of integrated circuits (ICs) and digital systems.

Objective :

The course can provide students with a solid foundation in both image processing and FPGA implementation, along with practical experience in integrating MATLAB with FPGA for real-world image recognition applications.

Expected Outcomes:

All the students who have participated in a two week workshop on “**Design of CMOS Technology using VHDL**” have felt free and realized the importance of research and very much enthusiastic to get them absorbed in research after completion of their studies.

ABOUT THE INSTITUTION

Sri Venkateswara College of Engineering & Technology, Etcherla was established in 2008 by **Vikas Educational Society** with an avowed Objective of accelerating the growth of science and technology in this industrially backward Srikakulam district. The Institution aims at providing state-of-the-art technology to the student community to broaden their horizon for a better and prospective tomorrow in their own interest and also in interest of the society at large. We have extensive record in the field of education. The institution is endowed with highly qualified and seasoned faculty on its rolls.

ABOUT THE DEPARTMENT

The Electronics & communication Engineering Department of SVCET was established in 2014. The department is currently offering UG Program B.Tech in ECE and PG Program M.Tech in VLSI Design Engineering. The Electronics & communication Engineering Department has the state of art infrastructure with well equipped labs, software and computer center spread in an area of 500 Sq.m. They are supported by experienced and qualified faculty

DEPARTMENT VISION

- Emerge as a Center of pre-eminence in Electronics and Communication Engineering education, research and services.

DEPARTMENT MISSION

- To produce graduates with scientific and technical knowledge and excellent electronics and communication engineering skills for professional practice, employment, advanced study and research.
- To inculcate professional and ethical values related to industry, society and environment.
- To interact with industries, to meet their requirements through employable.

The Department of Electronics and communication engineering organized a Two Week certificate program on “**DESIGN OF CMOS TECHNOLOGY USING VHDL**” for B.Tech (ECE) Students. Recently, CMOS TECHNOLOGY has been improvised into several recognition trending techniques by using several algorithms which are discussed in this session. Totally 43 students participated in this training program and after the completion of the program the students able to understand the following objectives and learning outcomes

Course Objectives: The student will be able to

- Gain a comprehensive understanding of CMOS (Complementary Metal-Oxide-Semiconductor) technology, including its principles, fabrication process, and basic building blocks such as transistors, inverters, and gates
- Develop proficiency in VHDL (VHSIC Hardware Description Language), including its syntax, data types, modeling constructs, and simulation techniques for describing digital circuits.
- Learn to design and implement CMOS circuits using VHDL, including basic building blocks such as inverters, gates, flip-flops, and arithmetic circuits
- Understand how to model CMOS transistors and interconnections at the transistor level using VHDL, including techniques for representing transistor behavior and parasitic effects.
- Explore techniques for integrating CMOS designs into larger system architectures, including interfacing with other digital and analog components, communication protocols, and system-level testing.

Course Outcomes (COs): At the end of the course, student will be able to

- Optimize CMOS circuit designs for various performance metrics, employing techniques such as low-power design strategies, timing optimization, and area minimization.
- Gain hands-on experience through project-based learning activities, designing, simulating, synthesizing, and testing CMOS circuits using VHDL to solve real-world problems.
- Understanding the principles of design for manufacturability in CMOS technology, considering process variability, yield optimization, and reliability in their designs.
- To integrate CMOS designs into larger system architectures, considering interfacing with other digital and analog components, communication protocols, and system-level testing.
- Understanding how to integrate analog and digital components in CMOS designs using VHDL, modeling analog behavior alongside digital logic to create mixed-signal systems.

ABOUT THE PROGRAM

This program focuses on the principles, techniques, and practical aspects of implementing digital signal processing (DSP) algorithms on various digital platforms, such as microcontrollers, DSP processors, and FPGAs. This program is essential for engineers and professionals working in areas where real-time processing of digital signals is required.

Objective :

The course can provide students with a comprehensive understanding of recent trends and advancements in wireless communications, along with practical skills in using MATLAB for analysis, simulation, and design in this domain

Expected Outcomes:

All the students who have participated in a two week workshop on **“Implementation of DSP Algorithms on Digital platforms”** have felt free and realized the importance of research and very much enthusiastic to get them absorbed in research after completion of their studies.

ABOUT THE INSTITUTION

Sri Venkateswara College of Engineering & Technology, Etcherla was established in 2008 by **Vikas Educational Society** with an avowed Objective of accelerating the growth of science and technology in this industrially backward Srikakulam district. The Institution aims at providing state-of-the-art technology to the student community to broaden their horizon for a better and prospective tomorrow in their own interest and also in interest of the society at large. We have extensive record in the field of education. The institution is endowed with highly qualified and seasoned faculty on its rolls.

ABOUT THE DEPARTMENT

The Electronics & communication Engineering Department of SVCET was established in 2014. The department is currently offering UG Program B.Tech in ECE and PG Program M.Tech in VLSI Design Engineering. The Electronics & communication Engineering Department has the state of art infrastructure with well equipped labs, software and computer center spread in an area of 500 Sq.m. They are supported by experienced and qualified faculty

DEPARTMENT VISION

- Emerge as a Center of pre-eminence in Electronics and Communication Engineering education, research and services.

DEPARTMENT MISSION

- To produce graduates with scientific and technical knowledge and excellent electronics and communication engineering skills for professional practice, employment, advanced study and research.
- To inculcate professional and ethical values related to industry, society and environment.
- To interact with industries, to meet their requirements through employable.

The Department of Electronics and communication engineering organized a Two Week certificate program on “**IMPLIMENTATION OF DSP ALGORITHMS ON DIGITAL PLATFORMS**” for B.Tech (ECE) Students. Recently, digital image processing has been improvised into several trending applications which are discussed in this session. Totally 43 students will be well-prepared to apply their knowledge and skills in DSP algorithm implementation to various engineering domains and industries where signal processing plays a crucial role also understand the following objectives and learning outcomes.

Course Objectives: The student will be able to

- Gain a solid understanding of digital signal processing fundamentals, including discrete-time signals and systems, Fourier analysis, and digital filter design techniques.
- Learn various DSP algorithms commonly used in signal processing applications, such as FIR filters, IIR filters, FFT algorithms, and spectral analysis techniques
- Acquire proficiency in programming and implementing DSP algorithms on digital platforms such as DSP processors, microcontrollers, FPGAs, and software-defined radio platforms.
- Learn optimization techniques for improving the performance and efficiency of DSP algorithms on digital platforms, including algorithmic optimizations, code optimization, and parallel processing.
- Understand the principles of hardware/software co-design for DSP systems, including partitioning algorithms between hardware and software components to achieve performance goals.

Course Outcomes (COs): At the end of the course, student will be able to

- Able to implement a variety of DSP algorithms on digital platforms, such as FIR filters, IIR filters, FFT algorithms, and spectral analysis techniques, using programming languages like MATLAB, Python, or C/C++
- Demonstrate proficiency in utilizing digital platforms for DSP algorithm implementation, including DSP processors, microcontrollers, FPGAs, and software-defined radio platforms.
- Able to optimize DSP algorithms for performance, efficiency, and resource utilization on digital platforms, employing techniques such as algorithmic optimization, code optimization, and parallel processing.
- DSP algorithms on digital platforms across various domains, such as audio processing, image processing, wireless communication, biomedical signal processing, and radar signal processing.
- Proficient in testing, debugging, and validating DSP algorithms implemented on digital platforms, utilizing simulation, emulation, and hardware-in-the-loop (HIL) testing techniques.

ABOUT SVCET:

Established in the year 2008 by Vikas Educational Society-the corporate social responsibility arm of SVCET Group and affiliated to JNTUGV, Vizianagaram. SVCET offers high quality technical education for aspiring Engineers. College is located in Etcherla, Srikakulam district of Andhra Pradesh. SVCET provides its learning community state-of-the-art facilities, infrastructure, and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of reinforcing its emphasis on a well-rounded education that makes SVCET a one of the preferred institutes among engineering colleges in India.

ABOUT THE CIVIL DEPARTMENT:

The Civil Engineering Department of SVCET was established in 2014. The department is currently offering B.Tech in Civil Engineering.

The Civil Engineering Department has the state of art infrastructure with well equipped labs, software and computer center spread in an area of 500sq.m. They are supported by experienced and qualified faculty. The laboratory facilities are available in all subject areas of Civil Engineering. In addition to the regular curriculum, the department is offering add on courses on communication skills, arithmetical reasoning, programming languages etc. for enriching the competitive knowledge of the students and preparing them for better employability. Students are also engaged in the projects works which demands the needs of social body in the surrounding situations as well as in the research projects. The department is also offering consultancy services in the areas of Material testing, Mix design and Analysis of structures. The clients are from R&B, RWS, Irrigation etc.

VISION:

Emerge as a Center of pre-eminence in Engineering, education, research and services.

MISSION:

M1) To produce graduates with scientific and technical knowledge and excellent engineering skills for professional practice, employment, advanced study and research.

M2) To inculcate professional and ethical values related to industry, society and environment.

M3) To interact with industries, to meet their requirements through employable graduates.

ABOUT THE PROGRAM

The design and drawing of composite bridges involve the use of composite materials, typically steel and concrete, to create efficient and durable bridge structures. Composite bridges offer several advantages over traditional bridge. **Material Selection:** Composite bridges.

Objective :

The objective of the design and drawing of composite bridges is to create safe, efficient, and durable bridge structures that effectively their intended purpose while minimizing environmental impact and maximizing cost-effectiveness. Here are the primary objectives

Outcome:

The outcomes of the design and drawing of composite bridges encompass several key aspects, each contributing to the successful realization of safe, efficient, and durable bridge structures. Here are the outcomes. **Safe and Reliable Structures:** The foremost outcome is the creation of bridges that are safe and reliable for all users, including vehicles, pedestrians, and cyclist.

ORGANIZING COMMITTEE:

- 1.Mrs K.Gayatri

PROGRAM REPORT

NAME OF THE PROGRAM: A Two week certificate Program on “FIELD COMPACTION
FOR SOIL AND ROAD WORKS ”

DATE : 04.04.2022 to 16.04.2022

RESOURCE PERSON :

Dr Ch. Vasudevarao.

Associate Professor,

Department of Civil Engineering,

Aditya Institute of Technology and Management, Tekkali

Mrs K.Gayatri.

Assistant Professor,

Department of Civil Engineering,

‘Sri Venkateswara College of Engineering and Technology, etcherla.

NAME OF THE CO-ORDINATOR

Mrs P.Jagannadharao,

Assistant Professor,

Department of Civil Engineering, SVCET

NUMBER OF THE STUDENTS ATTENDED: 94

VENUE: BLOCK – C : SEMINAR HALL & COMPUTER LAB – 3

The Department of Civil Engineering organized a Two Week certificate program on “Field compaction for soil and road works refers to the process of compacting soil layers and materials during construction to achieve the desired density, stability, and load-bearing capacity. It is a critical aspect of road construction, foundation preparation,

Objective :he objectives of field compaction for soil and road works around achieving the desired density, stability, and durability of compacted soil layers in order to ensure the long-term performance and safety of engineered structures. **Optimal Density:**

Outcomes:The outcomes of effective field compaction for soil and road works are crucial for ensuring the stability, durability, and performance of infrastructure projects. Here the key outcome. **Optimal Density Achieved:** Proper field compaction results in achieving the desired density of compacted soil

Resource Person:

This certificate course was very useful to students and their feedback is positive. The Management and Principal of Sri Venkateswara College of Engineering and Technology, thanked the resource person and participants for making the program successful.

ABOUT SVCET:

Established in the year 2008 by Vikas Educational Society-the corporate social responsibility arm of SVCET Group and affiliated to JNTUGV, Vizianagaram. SVCET offers high quality technical education for aspiring Engineers. College is located in Etcherla, Srikakulam district of Andhra Pradesh. SVCET provides its learning community state-of-the-art facilities, infrastructure, and a competent faculty. The Institute encourages collaborative learning between industry and academia as a means of reinforcing its emphasis on a well-rounded education that makes SVCET a one of the preferred institutes among engineering colleges in India.

ABOUT THE CIVIL DEPARTMENT:

The Civil Engineering Department of SVCET was established in 2014. The department is currently offering B.Tech in Civil Engineering.

The Civil Engineering Department has the state of art infrastructure with well equipped labs, software and computer center spread in an area of 500sq.m. They are supported by experienced and qualified faculty. The laboratory facilities are available in all subject areas of Civil Engineering. In addition to the regular curriculum, the department is offering add on courses on communication skills, arithmetical reasoning, programming languages etc. for enriching the competitive knowledge of the students and preparing them for better employability. Students are also engaged in the projects works which demands the needs of social body in the surrounding situations as well as in the research projects. The department is also offering consultancy services in the areas of Material testing, Mix design and Analysis of structures. The clients are from R&B, RWS, Irrigation etc.

VISION:

Emerge as a Center of pre-eminence in Engineering, education, research and services.

MISSION:

M1) To produce graduates with scientific and technical knowledge and excellent engineering skills for professional practice, employment, advanced study and research.

M2) To inculcate professional and ethical values related to industry, society and environment.

M3) To interact with industries, to meet their requirements through employable graduates.

ABOUT THE PROGRAM

The design and drawing of composite bridges involve the use of composite materials, typically steel and concrete, to create efficient and durable bridge structures. Composite bridges offer several advantages over traditional bridge. **Material Selection:** Composite bridges.

Objective :

The objective of the design and drawing of composite bridges is to create safe, efficient, and durable bridge structures that effectively their intended purpose while minimizing environmental impact and maximizing cost-effectiveness. Here are the primary objectives

Outcome:

The outcomes of the design and drawing of composite bridges encompass several key aspects, each contributing to the successful realization of safe, efficient, and durable bridge structures. Here are the outcomes. Safe and Reliable **Structures:** The foremost outcome is the creation of bridges that are safe and reliable for all users, including vehicles, pedestrians, and cyclist.

CIRCULAR

Here by informed to all the students that, the Department of Management Studies is planning to organize A Two-week ADD-ON Program on "EMPLOYEE TRAINING AND DEVELOPMENT" from 13-09-2021 to 24-09-2021. This program is aimed at enhancing your skills and knowledge in the field of employee training and development that how to do make calculations in accountancy. In this regard, I suggest all students should enroll this program on or before 09-09-2021.

**A TWO WEEK ADD ON
PROGRAMME ON**

**"EMPLOYEE TRAINING AND
DEVELOPMENT"**

*With the support of experts from Department Of
Management studies, SVCET, Etcherla*

From 13-09-2021 to 24-09-2021

CORDIALLY INVITES YOU

Profile of SVCET

Sri Venkateswara College of Engineering & Technology, Etcherla, Srikakulam (Dist.) was established in 2008 by VIKAS EDUCATIONAL SOCIETY (1997) with an avowed objective of accelerating the growth of science and technology in this industrially backward Srikakulam district. SVCET is accredited by NAAC in 2016. The Institution aims at providing state-of-the-art technology to the student community to broaden their horizon for a better and prospective tomorrow endowed with highly qualified and seasoned faculty on its rolls. Sri Venkateswara College of Engineering & Technology is committed to "Impart quality education to the youth enable them the right attitude, professional competency and inculcate ethical values. The Institute is a recipient of Best Green Campus award for 2017 by Govt. of A.P. in 2018.

VISION:

To enhance the managerial abilities of the students with holistic approach for global employment and entrepreneurship.

MISSION:

M1) To facilitate and promote excellent learning through knowledge dissemination and training.

M2) To promote conducive ambience of learning, growth & professionalism in both students and employees.

M3) To inculcate respect for all and to take care of every one and allow them to manifest their highest potential through the tasks they do.

**About Department of
MBA**

The MBA Department of SVCET was established in 2009. The department offers post graduate programme in MBA (Master of Business Administration) with specializations HR, Finance, Marketing under affiliated to JNTU, Kakinada.

It has an exclusive departmental library with reference books, in order to develop the innate skills of students everyday two hours are dedicated for seminars, team assignments, group discussions and various business and economic related activities. Students are encouraged to do regular case studies enabling them to understand the intricacies of management.

The department has well qualified and experienced faculty supported by trainers. The department adopts the right blend of practical approaches in training the students and placements.

Training programme on communication skills, presentation skills and interview skills, resume writing etc., being conducted to enhance the career prospects of students. A series of personality development programs are being conducted to encourage students to improve managerial skills.

Objective of this Program

The main objective of this Program is to provide an opportunity for students regarding as follows:

1. To develop the potentialities of people for the next level job
2. To impart the new entrants the basic knowledge and skill they need for an intelligent performance of definite job.
3. To ensure smooth and efficient working of a department.
4. To ensure the economical output of required quality
